Welcome to: **U**nited **C**ommunication **G**roup

UCG is a copyrighted and registered trademark in the field of communications, IT and web services providing. It has currently two locations in the Middle East: one in the United Arab Emirates and the other in Syria. The company was first founded in June 1997 in Abu Dhabi, UAE. The company got expanded and established a growing branch in Damascus, Syria during June 2004. **UCG** is one of the known investment company **UIG** "United investment Group" projects/brands and a part of the known consultancy company **ECC** "Eagles Communication Consultancy".

🟥 **UCG** Vision & Mission:

UCG was born from the absolute growing importance of communications, the ever dynamic "Information Technology" field and the essentials of security. **UCG** knows and understands the magnitude of complications and difficulties of entrepreneurial companies facing the technological and professional establishment. The amount of competition on national and international levels has become increasingly high. The goal of many corporations today is to find the best means to become technologically efficient and secure through the use of the internet and other computer systems based on applications. From both UAE and Syria, the **UCG** adopted the "end user" culture to enlighten and educate end users in how to improve their web usage and networking technologies. Well awared of global trends and local development, **UCG** is one of the developmental tool that many companies have benefited from, in order to facilitate new adaptable technologies, according to the geographical region. Since 2004, **UCG** have been continuously working hard to enhance the Arabic web content, and to implement international technologies and standards into that region.

🟥 Where are the **UCG** networks available?

In fact, our global services have no fixed place. In other words, we are your neighbors wherever you are. **UCG** networks starts from the most famous data center in the US called AtlantaNap; Atlanta's newest large scale datacenter. After 12 years in the internet business, the powerful AtlantaNap datacenter was well developed and engineered by its famous owner: the Global Net Access.
UCG networks consist in several self managed servers under our racks, powered by the spreading resources technology.

🟥 **SRT**: Spreading Resources Technology:

UCG founded the "**SRT- Spreading Resources Technology**" in June 2008. The hybrid technology mixes virtualization and de-virtualization. This new technology allows multi web servers to share and manage resources. **SRT** also allows the servers to work on minimal available resources and then, dynamically spread up resources usage referring to "UCG – IEEE Paper Oct 2008". For example, the UCG Network starts with two CPUs and easily spread itself up to eight CPUs per HN.

🟥 Why **UCG**?

UCG is proud to be using the state-of-art methods and technologies available in the world. We are specialized in information and communications technologies. We understand our client's needs through our numerous years of experience. Our business target is to vary specifications in a successful manner to present the required results. Our several services include: Web hosting for individuals, Web hosting resellers, Virtual private servers, Dedicated servers, domain names registration "gTLDs, ccTLDs" adding some special local extensions - .AE .SY .COM.SA .SA.COM .US .UK …", HD shout casting, SSL, System development, Servers Management, Services handlers optimization, Networking and Infrastructure, Security solutions, Smart designs, effective e-Advertising campaigns, etc.

If you are looking for the best informatics options, communications and development corroborator, so we represent what you are asking for. We have the ability to develop your project and give you integrated solutions without spending a fortune. It's the right time for you to believe in **UCG** and its limitless benefits with low cost including effective services.

🟥 **UCG** Market-share:

UCG is the 3rd hosting provider in Syria, 9th in the Gulf Cooperation Council (GCC) area.

🟥 **UCG** Project samples:

- **UCG**-CMS: A content management system
- **UCG**-PushM@iL: Mailing List Management "Bulk eMails system"
- Family Tree builder
- GPS GUI Fleet Manager
- **UCG**-SRT: Spreading Resources Technology for servers and cloud systems.
- Online Store B2B
- Joomla CMS "Optimized"
- Word-Press Blog "Optimized"
- Deals Shops & eCommerce
- ePayments integration
- Distributed systems

▪ UCG Green Technology:

- USING **SRT**:
  Using SRT makes life **GREEN**. While others are running large machines to serve a few customers or small businesses, we are running lower power consuming devices through SRT. This technology allows our network to start effectively from "150 watts" (similar to the power consumption of your laptop) up to a maximum of "350 watts" (similar to the power of your office desktop). Imagine a server plant that can serve more than 2000 customers with an average of "250 watts", it is a reality through our SRT.

- Working with **AtlantaNAP** "The most **GREEN** Data Center"
  When Data Centers were first built, no one ever thought much about things like energy efficiency and environmental impact. But AtlantaNAP helped in changing this fact. Meanwhile servers still require a significant power supply, a carefully maintained indoor environment, and fail-safe backup systems; AtlantaNAP developed new ways to do it all in a more sustainable way (visit atlantanap.com for more information).

▪ UCG Co-operations & Memberships:

UCG is not a non-profit establishment neither an organization, but from its cradle, **UCG** works with multiple organizations.

- **M**ember of the well-known engineering organizations " ", and has been an active member of IEEE for multiple years. Our **Group** offers special discounts for all IEEE members.
- **M**ember in Linux distribution board, "The most important operating system (OS) community", and is also an active development group in Linux "CentOS".

- **UCG** assists and participates in assisting many local non-profit organizations and charities such as:
- **M**ember of ISIC "International Student Identity Card", we offer special prices for all ISIC members.
- **UCG** offers special prices for all IT or engineering students in Syria and the UAE in "non-profit projects".
- **We** assist and participate in educational programs in several Universities and Institutes.
- **UCG** accomplishes credit training in cooperation with several Universities and Institutes such as "Private Universities & UN IT institutes".

UCG | Services and Products:

🟥 **UCG** Web Hosting Solutions:

UCG provides risk limited web hosting solutions with high availability and minimum down times. **UCG** uses its own created **SRT** technology and VPS solutions from "Virtuzzo – OpenVZ" which make down times negligible. **UCG** racks are distributed in Atlanta and Dallas, where we are currently serving more than 2000 companies.

UCG web hosting serves multi-level of web hosting solutions, starting from the individual hosting, resellers, VPSs and dedicated servers with multi-schemas' services quality, Intermediate, Advanced and Superior. In general, **UCG** uses Linux servers "CentOS" with special security and services configurations. **UCG** servers' supports "ASP-JSP | MONO – TOMCAT/ PHP5 – CGI – MYSQL – PgSQL – Python – Ruby and much more …"

UCG also uses Windows-OS to support MSSQL – ASP - .NET, **UCG** offers individual/Reseller windows hosting plans as well as dedicated.

UCG web hosting backups are generated daily, weekly, and monthly for both individuals and resellers accounts, then for all backups stored in back-end storage for more security.

UCG gives a special guarantee on web hosting products "individual hosting – resellers – VPSs" in two phases:

1- 30 Days Money Back guarantee
2- Renewal Prices = Purchase Prices or less.

■ UCG VPS Hosting:

VPS Hosting solutions are a great alternative compared to our competitors' dedicated servers. It is convenient for those who need more than a shared hosting account or reseller.

VPS Hosting accommodates an affordable solution for small businesses that need special features such as **SSH access, custom firewalls, dedicated IP addresses** or other features usually reserved for dedicated servers.

All VPSs Include:
- Full root access
- 100% Network Uptime SLA
- HDD RAID Technology
- 50$ Setup Fees "One Time"
- **FREE** OS-Reloading
- **FREE** initial server hardening and security
- **FREE** initial software installation "Mod_Security - cPanel - Fantasctico - CSF FireWall - etc .."
- **FREE** WHM/cPanel with Fantastico License

- Intermediate Starter VPSs:

VPS-IV1 : "55 $ - 220 AED – 9,000 S.P"/Mo	
Disk Space	**25 GB**
Bandwidth	500 GB
Guaranteed Memory (RAM)	512 MB
CPU Cores	One
Burst Memory (RAM)	1024 MB
Full Root Access	Yes
24/7 Monitoring & Support	Yes
Network	10 Mbps
Control Panel	cPanel/WHM,
Offer	No Available offers
Operating System	CentOS Linux

VPS-IV2 : "75 $ - 300 AED – 13,500 S.P"/Mo	
Disk Space	**40 GB**
Bandwidth	800 GB
Guaranteed Memory (RAM)	768 MB
CPU Cores	Two
Burst Memory (RAM)	1536 MB
Full Root Access	Yes
24/7 Monitoring & Support	Yes
Network	10 Mbps
Control Panel	cPanel/WHM,
Offer	No Available offers
Operating System	CentOS Linux

UCG-ORSC "Online Radio Shout Casting":

UCG Online Radio Shout Casting offers a very good and effective solution to get your own online radio, where you can have more traffic to your own "FM-AM" traditional channel, also in order to increase your business turnover. In some cases and areas, people may have their online radio without having any "FM-AM" channels or may use it for educational projects or entertainment wise. Manage your online radio as never before, where you can either buffer programs or live stream them. UCG Online Radio Shout Casting is great and cost effective solution. **UCG** offers this service with QoS from 32 kbps up to the HD bit rate.

UCG-ORSC Features:
- Setup Latest ShoutCast: cPanel users can setup ShoutCast from their cPanel.
- Manage Shoutcast: Start/Stop/Restart/Edit/Update ShoutCast.
- Intro - Backup Features: Manage ShoutCast intro-backup features. BackupFile can specify an mp3 file that will be streamed to listeners over and over again when the source stream disconnects. This feature is useful when a DJ changes on the radio.
- AutoDJ Features: AutoDJ is great tool, allow you to setup Automatic deejay's to ShoutCast, auto play mp3 files, automix, shuffle and playlist features. AutoDJ is useful when real dj is not streaming.
- Download Scripts - Tools: Users can download a large variety of useful tools; "listen-live-script", download and usage details are included in how to integrate the player with web sites.
- Supported players: Flash Player – Media Player – Quick Time – Winamp – Real player.
- Online File manager – FTP.
- One configurations file for all, easy to customize
- Many other practical features …

UCG CMS & PushM@iL:

UCG-CMS "Content Management System":
Over and above UCG's keen attention to customer satisfaction in the end user security, UCG has pushed it's know how to present the world with a secure, reliable and efficient Content Management System.

UCG-CMS has been vigilantly designed to be as user friendly as possible with a light attribute to it. Without a doubt, corporations, organizations and institutions worldwide spend fortunes on different software systems to handle its valuable information resources that are vital to run the core of their businesses. Such information includes databases, indexes, customer information, profiles, bank accounts and much more. A poor managed data handles pushes up costs and errors in the functions of companies. UCG – CMS is the most advanced and simple remedy that can be tailored for your needs. We strive to fulfill your content management requirements using our latest AJAX experience.

For more details: ucg-cms@ucg.ae

UCG-PushM@iL:
As the worldwide technology and personal annual income have improved over the years, an increasingly amount of people can go online to communicate through electronic mail for business or leisure purposes. This increasingly wealth of information being transferred via links, networks and servers can become a cumbersome task for inefficient corporations and organizations who aspire to use this essential communication method.

UCG boasts another technologically sophisticated product: a professional mailing list system called PushM@iL.

What is PushM@iL?
The trouble-free UCG-PushM@iL has been created after three years of research and development to deliver a high speed, trustworthy and dependable mail list system.

This innovative system carries with it a large variety of features that include:

- Send mails as if it's sent from your inbox using SMTP authentication.
- Mails will never flag as SPAM unless your original mail is SPAM listed.
- Secured online application using HTTPS over SSL.
- Secured and Enhanced out mail "SMTP" using "ESMTP + TLS.
- Bounce back mails reporting and bouncing filter options
- Campaigns tracking, viewers reporting and comparisons.
- Data Base remote access or JAVA List feeding, just upload the TXT list file and the SYS will import it quickly.
- Browser time or Auto Sender, Create mail >> Select the category >> Send >> Done, The SYS will work in background.
- Schedule e-Mails advertisement campaigns to be done on a specific time.
- Compose e-Mails as never before using AJAX- RichTXTEditor.
- Archive old e-Mails advertisement campaigns to resend.
- Build a data FTP manageable source on the online storage "500MB - 4GB" to reuse and to reduce uploading time "Optional"
- Perfect online HTML editor to create professional HTML mails.

UCG Networking & Servers Management:

Networking and Servers Management is the life blood of any enterprise. Without a solid information exchange system, enterprises would not be functional or operative to serve their purpose.

UCG works on 3 networking phases:

    A. Construction

    B. Management

    C. VOIP

A. Construction:

UCGs' cost-efficient CISCO/IEEE engineers have proven their wealthy experience over many years in the networking and servers management field. They cater for small and large networks. Customization is the heart of the UCG's Networking and Servers Management success. We can afford infrastructure designing, routing, cabling, installing and testing the network according to your specifications. The small networks range starts from "10 clients – Home" up to large enterprises "100+ clients". Moreover, LAN connection can be customized according to the requirements: Wired or Wireless.

UCG is a leading communications contractor in the field of structured cabling. Whether your requirements are voice, data, video, or fiber optic, our staff of well-trained professionals is here to ensure a quality installation.

Since 2004, **UCG** has built a reputation on **QUALITY**, **SERVICE**, and **DEPENDABILITY**. Our mission is to provide our customers with solutions that will meet their needs today and in the future.

Our Services:

- Engineering
- LAN and WAN Design
- Installations
- Certification
- Troubleshooting
- Cables Providing

Advances in technology and the high level of expertise demanded in all aspects of the communication field today make a structured cabling contractor more essential than ever before.

Contact us at: networking@ucg.ae for any further information or details.

B. Management:

1- Network management:

Network management refers to the activities, methods, procedures, and tools that pertain to the operation, administration, maintenance, and provisioning of networked systems.

- Operation deals with keeping the network (and the services that the network provides) up and running smoothly. It includes monitoring the network to spot problems as soon as possible, ideally before users are affected.

- Administration deals with keeping track of resources in the network and how they are assigned. It includes all the "housekeeping" that is necessary to keep the network under control.

- Maintenance is concerned with performing repairs and upgrades—for example, when equipment must be replaced, when a router needs a patch for an operating system image, when a new switch is added to a network. Maintenance also involves corrective and preventive measures to make the managed network run "better", such as adjusting device configuration parameters.

- Provisioning is concerned with configuring resources in the network to support a given service.

Our Services:

- Integrated business planning

- Network administrator

- Network monitoring

- Network performance management

- Network traffic measurement

- Systems management "Microsoft OS - Unix - Linux"

- Application service management

- Website monitoring

- In-network management Network management system

- Layer 2 in-site/remote management "Cisco - Huawei - DLink" Managed switches/routers

2- Servers Management:

Servers Management is an essential component to Networking. Your server can be conveniently designed and installed to produce seamless operations and results in a hassle-free environment.

In addition, our expertise in security protection guards your system against hacking, data theft and malicious software that may create irreversible damages.

We are dedicated to provide consultation for all your networking, server management and security needs. Our trained workforces are composed of certified engineers and technicians that are readily available to satisfy all your demands.

Our Server Management services offer the following:

- Security Software Solutions
- OS Level Hardening
- Securing Services
- Service Optimizations
- 3rd Party Software Installation
- Disaster Recovery and Hack Recovery
- Log Monitoring
- Environment Security "Local Servers – Systems"

3- IT/Communication Consultancy:

UCG consultancy services are offered via our independent consultancy company "ECC – Eagles Communication Consultancy".

ECC Services:

- NOC Management

- Projects Management

- Risk Management

- Integrated Solutions

- Training & Courses

- Standardizations

- Infrastructure Planning

- e-Marketing

For more details, email us at: e-sales@UCG.ae or visit: www.ECC-ae.com

C. VOIP:

1- Hardware:

UCG has built its own configured tower VOIP servers from well known brands "DELL – HP – FUJITSU". UCGs' VOIP hardware "SERVER" has its own add-ons and configurations.

Specifications:
- VOIP READY
- PSTN READY
- High Quality Power Supply
- UCG MS-WinXP – Win2003 OS
- FAX SERVER READY
- UPS "Optional"

For further details, e-mail us at: voip.hw@ucg.ae

UCG is an authorized reseller/distributor of: SANGOMA / OpenVox. For more information visit: www.UCG.ae

2- Software "3CX":

3CX Phone System is a software-based IP PBX for Windows which replaces traditional PBX hardware phones. It is based on the SIP standard and supports standard SIP software / hardware phones. It allows calls to be made via a VOIP service provider or via the regular PSTN. Easy to install and configure, it includes a web-based configuration interface, voice mail, auto attendant, call hunting and other features.

For license pricing, Visit UCG web site: http://www.UCG.ae

Note: Public VOIP services require governmental approvals and UCG highly respect all local laws restrictions.
